Introducing the GE SmartCommand™ system
Comfort. Control. Convenience.

Intelligent systems integration and energy savings have a new home.

feeling right at home

With the GE SmartCommand™ system, homeowners enjoy an environment that is customized to fit their lifestyle. Using an aesthetically pleasing color touchpad, homeowners determine comfort levels by selecting temperature, lighting and audio settings. Preset temperature and lighting levels can be established for daytime or night, home or away and other specific conditions or timeframes.

SmartCommand products provide peace of mind with an integrated GE security system that can be programmed to fit each homeowner's needs. They can take comfort in the fact that with SmartCommand products, they will never outgrow their system. Options include integrating any combination of intercom/audio, security, lighting, or heating and air conditioning control or integrating all systems. With the SmartCommand system, it's easy to enjoy the comforts previously afforded to a select few.

comfort

HOME ENVIRONMENT COMPLETELY CUSTOMIZED TO PERSONAL PREFERENCES

TEMPERATURE CONTR0L • CUSTOMIZED AUDIO/INTERCOM SETTINGS

LIGHTING CONTROL • PEACE OF MIND • GE QUALITY AND RELIABILITY
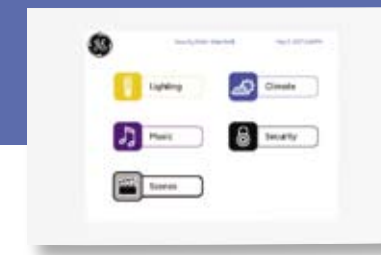

all systems go

Seamlessly integrating security, lighting, HVAC, and audio/intercom, GE SmartCommand™ products provide comfort, control and convenience through a common user interface. The GE SmartCommand system is a scalable solution that can accommodate virtually any application and need. Easy to install and infinitely customizable, SmartCommand products add tangible value to builders, installers and homeowners.

SmartCommand Communicating Thermostat

• Backlit LCD display provides easy viewing in any lighting condition: temperature, set point, system mode, fan mode and time

• Rich information is easily retrieved, viewed and controlled

• Works with all standard gas/electric and heat pump HVAC systems, including multi-stage units

• Easy to program to reflect homeowners' needs

SmartCommand Color Touchscreen

• 7.8" color screen displays complete information on an easy-to-read screen

• 640 x 480 resolution provides excellent screen visibility and touch control of all functions with a large touchscreen area

• Simple programming to customize the look of the touchscreen

• Interfaces with NetworX™ and Concord 4™ security systems

SmartCommander™ Hub

• Controls lighting, security, thermostats, multi-room audio, relays and more so that homeowners enjoy comfort, control and convenience

• Create schedules, macros and scenes

• Real-time astronomical clock for precise, synchronized timing of device controls

just the right touch

No system provides more powerful central control to home environments than the SmartCommand system. Through the SmartCommand Color Touchscreen, homeowners have complete command and control of their heating and air conditioning, audio/intercom, lighting and security systems. Information is custom-displayed on a user-friendly touchpad, allowing easy access, monitoring and adjustment.

SmartCommand products seamlessly bring together these once disparate systems, allowing them to communicate with one another through the SmartCommander™ Hub. Now, lighting can be pre-programmed to go on when the security system is in specific modes or at certain times of the day or night. Heating and air conditioning systems can be preset to operate at different levels during occupied or unoccupied times, providing substantial cost savings

simplicity shouldn't be a luxury

With an intuitive, user-friendly touchscreen, the SmartCommand system brings simplicity of operation and convenience to any room in the house. Whether it's heating, air conditioning, audio/intercom, lighting or security systems, with SmartCommand products access is quick and convenient. Designed to integrate and be compatible with a wide variety of lighting and HVAC system protocols, the SmartCommand system allows these once disparate systems to work together to deliver a unique, customizable environment to meet any homeowner's needs.

With Ethernet ports for network and Internet connectivity, home systems can be accessed remotely via PC for complete convenience and control anywhere, anytime. With easy add-ons and plug-and-play components, you'll never outgrow the SmartCommand product family.
